

Print on materials up to 10 mm thick. Be able to print on Corrugated Plastic and Foam Board as well as Vinyl for Vehicle Wraps.

Leverages Mutoh's Patented interweave print technology to eliminate banding and achieve print speeds up to 120 sqft/hr.

Take control of your color matching challenges with the optional on-board spectrophotometer. SpectroVue will enable you to rely on your Mutoh's ability to print consistent color from job to job, month to month, and material to material.
